    AND ESXDomain.AccountID = {ACCOUNT}                                --Filtering on the selected company
    AND HostDomain.AccountID = {ACCOUNT}                                --Filtering on the selected company

```

The statement adds the following information as a virtualization host:

- ESX Service Name (the inventoried vCenter).
- Data Center Name
- ESX Host

Furthermore, within the statement, the last two columns filter on the account/company for which the notification task is set up. If there are multiple companies in your Docusnap database and you do not want to set up a separate notification task for each, then simply remove the last two lines.
