

# DOCUSNAP CASE STUDY

## Bayerischer Landtag

*Germany*

## Project Description

### Bayerischer Landtag

The Bavarian Parliament, based in Munich, is the state parliament of the Free State of Bavaria and its highest constitutional body. From the Bavarian Parliament, also known as the "Maximilianeum", the members of parliament, currently organized in six factions, are responsible for politics in the Free State of Bavaria. Modern communication in the form of a comprehensive IT structure has long since found its way into the Bavarian Parliament. However, the peculiarities of the political system must be taken into account.

The IT department of the Bavarian parliament is responsible for the clients and servers of the state parliament office and the network infrastructure for the state government factions. However, this task repeatedly presents the IT team with major challenges. For example, the individual factions must be strictly

ly records all hardware and software and thus enables a complete mapping of the entire IT infrastructure. In addition, the actual data becomes much clearer and more transparent thanks to Docusnap's analysis of employee access rights. Managing licenses with Docusnap provides a good overview of the installations that are needed, avoiding over- or under-licensing.

**"Our infrastructure repeatedly presents us with major challenges. With Docusnap, we now have a tool that we can use to solve them."**

separated from each other in the IT infrastructure so that data from other factions cannot be viewed. However, it must be possible for all factions to use central applications.

#### Relief through automation

In principle, those responsible in the Bavarian parliament had great difficulty in keeping the IT documentation up to date. In the growing and constantly changing IT environment, it had become increasingly difficult to create and maintain compliant IT documentation and to have it ready to hand for daily work. The workload was just too enormous. "We urgently needed to relieve the burden on our employees by implementing an automated system," said the IT manager of the Bavarian Parliament. When the project was carried out by "keepbit SOLUTION GmbH" from Augsburg, the specialists opted for the Docusnap software solution. One of the main reasons: The software automatical-

#### Cost and time savings with Docusnap

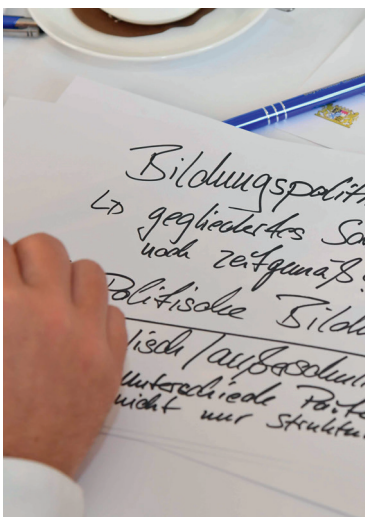

"Using Docusnap saves the state parliament and thus the Bavarian state hard cash," says Adnan Bastürk, the project manager at keepbit SOLUTION GmbH. The IT employees of the Bavarian parliament are now saving a great deal of expensive working time, because the IT documentation only has to be created once and is then maintained independently by Docusnap. "With each scan, the current information enters the Docusnap system and the documentation is updated automatically," continues Bastürk. This is exactly the solution they had been hoping for.

#### Conclusion

Docusnap is used extensively in the Bavarian Parliament and brings transparency to areas where it is necessary for reliable and precise IT documentation. The software solution has simplified the work for the team. With Docusnap, the team of the Bavarian

## BAYERISCHER LANDTAG and Docusnap

### THE COMPANY

The Bavarian Parliament is the parliament of the Free State of Bavaria and is thus one of the supreme state organs. The central tasks of the Bavarian Parliament include representing the population, forming and controlling the government, and legislating.

### THE TASK

The IT network of the Bavarian Parliament is to be comprehensively documented and the IT department is to be relieved to such an extent that it has more time for other important resources. What was needed was a software that documents the IT network in a largely automated way.

### THE SOLUTION

The IT department of the Bavarian Parliament uses the Docusnap software solution to inventory

and document the entire IT network. The team ensures that the IT documentation is always up to date. Docusnap allows the Bavarian Parliament to map the complete IT environment conveniently, in detail and automatically.

### THE BENEFIT

Docusnap provides the IT department of the Bavarian parliament with meaningful data about the IT network. Docusnap saves the Bavarian parliament a great deal of time and thus money. The creation of IT documentation is now largely automated, reducing the workload of the IT department and allowing it to focus on its core tasks.

Parliament has all the information it needs, perfectly prepared and quickly accessible always – and all automated. A comprehensive overview of the current IT status is guaranteed for the Bavarian Parliament thanks to Docusnap.

**" The use of Docusnap saves the state parliament and thus the Bavarian state money."**
